

# LAL Language Centres

## Technical English for Engineering

This course is for anyone who needs to develop the communication skills and specialised language required for the engineering field, and will enable students to communicate more effectively with colleagues and clients. You will be introduced to areas such as civil, electrical and mechanical engineering. You will develop your vocabulary to enable you to communicate more effectively on technical subjects, and you will use authentic texts and realistic tasks to help prepare you for the engineering environment. The course will be tailored to meet the needs of the students.

### Course content sample

---

- Civil engineering
- Electrical engineering
- Mechanical engineering
- Astronomy and physics
- Mathematical symbols and measures
- Making calculations
- Statistics
- Describing an engineering process
- Making effective, logical presentations
- Information Technology
- Computer security
- Writing engineering reports
- Academic writing
- Procedures and precautions
- Monitoring and control

Lessons per week: 15 (20 hours)  
Schedule: Mornings or afternoons  
Class size max: 12 students  
Levels: B1+  
Available in: Fort Lauderdale  
Course length: 2-8 weeks  
2017 start dates: 06 Feb, 01 May, 02 Oct
